

President's address

These past two difficult years have seen organisations adapting and fighting to survive. When I reflect on the past two years for the Foundation, I am heartened to see that not only has the Foundation adapted, but it has been strengthened through its adaptations. When the pandemic hit the world, the Foundation reacted by starting the online Lunctime Lecture Series. This has now become one of the core activities of the Foundation, reaching up to 400 participants in on average 40 different countries each episode. I am confident that the Foundation will continue to go from strength to strength over the next few years.

Eng. A. Al-Mogbel

ITACET Foundation President

Training session reports

MAITRISE DE L'EXCAVATION ET INSTABILITÉS EN MÉTHODE CONVENTIONNELLE

Date: 05/09/2021
Location: Paris, France

At the occasion of the AFTES 2021 congress, a training session on "Excavation control and instabilities in conventional excavation methods" was held and gathered 32 participants. The session was opened by the President of AFTES, Michel Deffayet who welcomed participants to the training. This was followed by a presentation...

Other news

SHINKUN-LA TUNNEL - WORKING IN THE HIMALAYAS (PART 1)

Past ITACET scholarship recipient Sandeep Nirmal and his colleague Ahmed Shaz recounts for us their adventures working in the Himalayas on a tunnel project.

In early July, when most of India is under the influence of heat waves, we were standing on top ice laden Shinkunla pass at an elevation of 5054m, an unexplored, untouched axis connecting Himachal Pradesh to Zaskar (Ladakh). Snow around us, all white. It was a single lane rough...
